### **Range Safety**

Treat every airgun as if it were loaded.

Double check it especially when receiving an airgun from someone else.

Never point an airgun, either loaded or unloaded, at any person.

Always keep the airgun pointed in a safe direction, down the range.

Keep your finger off the trigger until you are aiming at the target and about to shoot.

Appropriate eye protection to be worn on the range at all times.

Airguns that are not in use should always be unloaded.

No airgun is to be left unattended.

Only cock or load an airgun when you are about to shoot at your chosen target.

If you encounter any problems with your airgun please mention this to Mark before attempting to resolve the issue yourself.

Do not rely on an airgun's 'safety'.

Break barrels airguns, hold the barrel while loading!

Under lever airguns, hold the lever while loading!

When you are loading keep airguns pointing down the length of the range.

Do not 'walk' onto the range to reset or change targets etc. until all airguns have been unloaded, checked and placed on the shooting table and you have been given permission to do so.

The shooting of live quarry is forbidden.

You must hold valid insurance to shoot the range unless under instruction.

Stop shooting immediately when requested to do so.

Shoot safely and respect other shooters
